

## Important Safety Information

UV-C STERILON 36W / 72W / 108W

**It is imperative that the organisation for whom this UV-C lamp is being used has written and shared, with the operatives of the product, a suitable Method Statement and Risk Assessment for its usage.**

### Exposure method

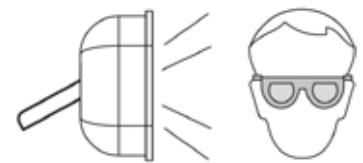

- Set the light so that it falls on the surface to be disinfected.
- The UV-C light source should be positioned as close as possible to the surface to be disinfected, so that the scope of UV-C rays covers the largest part of it. Objects placed in the shade, where the UV-C rays cannot reach, will not be disinfected.
- After starting the lamp, you cannot stay in the room. Wear protective glasses when turning it on/off.
- Approximate exposure time is 15 min.
- Very long exposure to the UV-C lamp can degrade some elements within its range, e.g. plastics.
- After the exposure is complete, ventilation of the room is not required.

### Operational safety

The UV-C light emitted by the lamp is highly harmful to humans and other living organisms. The UV-C light is harmful to the eyes and skin. After starting the lamp, there must be no people or animals within the range of direct UV-C rays. You should minimise the time of being within range of the UV-C rays.

Lamp damage bears a low risk of negative impact on your health. If the fluorescent lamps break, ventilate the room for 30 minutes and remove the parts, preferably with gloves. Place them in a sealed plastic bag and take to a local waste disposal facility for recycling. Do not use a vacuum cleaner.

**Never look directly at the UV-C light or stay within range. Safety glasses are recommended.**

**Secure the working area to prevent other people from being exposed to the dangerous UV-C light.**

MADE IN EUROPE

Luminaire parameters are given with tolerance permitted by the standard. The manufacturer reserves the right to change the parameters of the product not for the worse, in the course of its improvement, and to make design changes or upgrade the product. Materials presented in the booklet are not a commercial offer. The complete, current offer of Lena Lighting along with current parameters can be found on the manufacturer's website - [www.lenalighting.pl/en](http://www.lenalighting.pl/en).

UV Clean Light is the sole distributor of Lena Lighting's Sterilon UV-C lighting products in the United Kingdom - <https://uvcleanlight.co.uk>
